III. DETAILED ACTION

1. Claims 2-18, 20, 22-25 and 27-35 are presented for examination.

2. Applicant's arguments submitted on 1-27-2004 with respect to claims 2-18, 20, 22-25 and 27-35 have been reconsidered but are not deemed persuasive for the reasons set forth below.

Response to Applicant' Remarks

- 3. Examiner has completed a through study of Applicant's amendment of January 27, 2007.
- 4. Especially, Applicant's amendments to claims 2-18, 20, 22-25 and 27-35 and remarks at pages 10-12 of the Amendment of 1-27-2004 has been carefully studied and reviewed.
- 5. Applicant's amendments to claims 2-14, 16-18, 20, 22-25 and 27-35 further direct the claimed invention into a method for detecting telecommunication fraud performed in a data processing system having a data warehouse and an OLAP server.
- 6. Examiner has carefully and thoroughly studied and reviewed Applicant's amendment of 1-27-2004. Examiner asserts that

Art Unit: 2175

<u>Tuzhilin</u> in combination with <u>Han</u> teaches Applicant's claimed invention of a method for detecting telecommunication fraud performed in a data processing system having a data warehouse and an OLAP server.

In addition, the specially discussed feature of the claimed invention ("generating a volume-based calling pattern cube for each individual customer based on the multi customer calling profile cube") is very clearly discussed in (Tuzhilin Col. 3, lines 40-41 and Fig. 1-3).

- 7. Applicant is inaccurate for the reasons explicitly stated in the first Office Action. Examiner asserts that <u>Tuzhilin</u> in combination with <u>Han</u> teaches Applicant's claimed invention of a method for detecting telecommunication fraud performed in a data processing system having a data warehouse and an OLAP server.
- 8. These reasons have been explicitly stated in the first Office Action. Please see the next section.

Art Unit: 2175

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which the subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

10. Claims 4-5, 14, 16-18, 20, 22-25, 27-28 and 31-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuzhilin (U.S. Patent No. 6,236,978 B1) in view of Jiawei Han, ("Towards On-Line Analytical Mining in Large Databases," ACM SIGMOD Record, 27:1, pp. 97-107, 1998 and Han hereinafter).

As to Claims 27, 14, 28 and 31, <u>Tuzhilin</u> teaches a method for detecting telecommunication fraud(i.e. fraud detection systems <u>Tuzhilin</u> Col. 14, lines 30-32) performed in a data processing system having a data warehouse and an OLAP server, the method comprising:

retrieving a plurality records from data warehouse (i.e. user transaction collection and recording unit) (<u>Tuzhilin</u> Fig. 6a);

Art Unit: 2175

generating a calling profile cube (i.e. m-dimensional space <u>Tuzhilin</u> Col. 7, lines 60-67) based on the call records; wherein the calling profile cube includes information on multiple customers (<u>Tuzhilin</u> Col. 3, lines 40-41, and Col. 5, line 4-20 and Fig. 1-3);

generating a volume-based calling pattern cube for each individual customer based on the multi customer calling profile cube (Tuzhilin Col. 3, lines 40-41 and Fig. 1-3);

comparing the volume-based calling pattern cube for each customer to a predetermined fraudulent volume-based calling pattern (Tuzhilin Col. 11, line 65) and (Tuzhilin Col. 3, lines 40-41 and Fig. 1-3); and

when the volume-based calling pattern cube is in a first predetermined relationship with predetermined fraudulent volume-based calling pattern, performing a first action (Tuzhilin Col. 12, lines 1-3) and (Tuzhilin Col. 11, lines 65) and (Tuzhilin Col. 3, lines 40-41 and Fig. 1-3).

Tuzhilin does not explicitly teach OLAP.

 $\underline{\text{Han}}$ teaches OLAP ($\underline{\text{Han}}$ Fig. 1 and page 3, section 2.2-2.3 and page 4, section 2.4, page 5 section 2.5, page 6 section 2.6).

Art Unit: 2175

Therefore, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to have modified <u>Tuzhilin</u> to include: OLAP.

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to have modified <u>Han</u> by the teaching of <u>Tuzhilin</u> to include: OLAP with the motivation to greatly enhance the power and flexibility of exploratory data mining as taught by <u>Han</u> (See page 2, paragraph 3).

As to claim 4, <u>Tuzhilin</u> as modified teaches a method for analyzing the calling pattern cube (i.e. data cube) by utilizing at least one performing OLAP operation (See <u>Han</u> page 3, section 2.3).

As to claim 5, <u>Tuzhilin</u> as modified teaches a method for OLAP operations is one of a roll-up operation, a drill-down operation, a dice operation, a slice operation (See <u>Han</u> page 3, section 2.3) and an ad-hoc query (i.e. be able to browse conveniently, See <u>Han</u> page 3, section 2.2).

As to claim 16, <u>Tuzhilin</u> as modified teaches a data processing system comprising:

Art Unit: 2175

an analysis tool for use by a data analyst to perform one of comparing the calling pattern cube to known fraudulent calling pattern cube (<u>Tuzhilin</u> Col. 13 lines 51-52, Col. 14 lines 28-32) and extracting information from the calling pattern cube based on selected dimensions, levels, and ad-hoc queries provided by the data analyst (<u>Han</u> page 4, section 2.4, page 5 section 2.5, page 6 section 2.6) and (page 3, section 2.2).

As to claim 17, <u>Tuzhilin</u> as modified teaches a data processing system comprising:

a visualization tools for use by a data analyst to display the calling pattern cube in different formats, levels and dimensions (See Han page 3, section 2.2, 6th paragraph).

As to claims 18, 23 and 32-33, <u>Tuzhilin</u> as modified teaches a data processing system comprising:

a data staging tool for transferring data between the profile cube stored in the OLAP server and profile table in the data warehouse at predetermined time intervals (See Han Fig 1).

As to claim 20, <u>Tuzhilin</u> as modified teaches a method comprising:

Art Unit: 2175

utilizing an OLAP server to create a calling profile cube (See <u>Tuzhilin</u> Col. 7, lines 35-67), updated calling profile cubes (See <u>Tuzhilin</u> Fig. 2, and Col. 7, lines 35-67), derive calling pattern cubes from the calling profile cube, analyzing calling pattern cubes, and comparing calling pattern cubes (See Tuzhilin Fig. 4 and col. 11, lines 43-52);

wherein OLAP programming supported by the OLAP server provides a scalable computation engine for generating and processing the calling pattern cubes (<u>Han</u> Fig. 1 and page 3, section 2.2-2.3).

As to claim 22, <u>Tuzhilin</u> as modified teaches a method wherein the calling profile cube is a multi-dimensional and multi-level cube and wherein the volume-based claaing pattern cubes are multi-dimensional and multi-level cubes (See <u>Han</u> page 3, section 2.3).

As to claims 24 and 34, <u>Tuzhilin</u> as modified teaches a method wherein the calling profile cube (i.e. data cube) includes a probability distribution value based on one of the probability distribution on calls to each callee and the probability distribution (i.e. probability distribution) on all calls (See Han page 5, 2nd column, 2nd paragraph).

Art Unit: 2175

As to claims 25 and 35, $\underline{\text{Tuzhilin}}$ as modified teaches a method wherein the dimension include a

day-of-week hierarchy, a time hierarchy, and duration hierarchy (i.e. day_of_week) (See <u>Tuzhilin</u> Col. 6, lines 13-15); profile data cube represents a plurality of customers (i.e. cust m-dimensional space, See <u>Tuzhilin</u> Col. 7, lines 60-62), and the pattern cube represents an individual customer (See <u>Tuzhilin</u> Fig. 3, item 60).

Allowable subject Matter

- 11. Claims 2-3, 6-13, 15 and 29-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 12. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record (<u>Tuzhilin</u> (U.S. Patent No. 6,236,978 B1) and <u>Jiawei Han</u>, ("Towards On-Line Analytical Mining in Large Databases," ACM SIGMOD Record, 27:1, pp. 97-107, 1998) does not disclose, teach or suggest the claimed limitations of (<u>in combination with all other features in the</u> claims):

retrieving records from the call table and based thereon generating a snapshot cube representing the records from the call table, the snapshot cube having predetermined dimensions; retrieving records from the profile table and based thereon generating a profile cube representing the records from the profile table, the profile cube having predetermined dimensions that are the same as the dimensions of the snapshot cube;

Art Unit: 2175

merging the snapshot cube and the profile cube to generate an updated profile cube and deriving a volume-based calling pattern based on the updated profile cube, as claimed in claim 2.

The prior art of record (<u>Tuzhilin</u> (U.S. Patent No. 6,236,978 B1) and <u>Jiawei Han</u>, ("Towards On-Line Analytical Mining in Large Databases," ACM SIGMOD Record, 27:1, pp. 97-107, 1998) does not disclose, teach or suggest the claimed limitations of (<u>in combination with all other features in the claims</u>):

flagging a particular caller with the probability based calling pattern being analyzed as suspicious;

automatically generating an alert that specifies callers with suspicious probability-based calling pattern;

performing further investigation on callers with suspicious probability-based calling pattern;

cancellation of telephone services for callers with suspicious probability-based calling pattern; and

performing other appropriate remedial actions, as claimed in claims 3 and 29.

The prior art of record (<u>Tuzhilin</u> (U.S. Patent No. 6,236,978 B1) and Jiawei Han, ("Towards On-Line Analytical

Art Unit: 2175

Mining in Large Databases," ACM SIGMOD Record, 27:1, pp. 97-107, 1998) does not disclose, teach or suggest the claimed limitations of (in combination with all other features in the claims):

detecting telecommunication fraud by comparing known fraudulent profiles to caller pattern cubes; the profile engine further generating a profile cube from information selected from the profile table, generating a snapshot cube, updating the profile cube by merging the profile cube and the snapshot cube to generate art updated profile cube, and deriving a calling pattern cube based on the updated profile cube; wherein the profile engine is a scalable computation engine that is implemented by OLAP programming supported by the OLAP server, as claimed in claim 15.

Claims 6-13 are objected to as being dependent from the objected to dependent claim 2.

Claims 30 are objected to as being dependent from the objected to dependent claim 29.

Art Unit: 2175

Conclusion

13. THIS ACTION IS MADE FINAL, Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory- period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136 (a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply-expire later than SIX MONTHS from the mailing date of this final action.

Points of contact

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yicun Wu whose telephone number is 703-305-4889. The examiner can normally be reached on 8:00 am to 4:30 pm, Monday -Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dov Popovici can be reached on 703-305-3830. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9306 for regular communications and 703-746-7240 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
